

AP Physics Summer Assignment

Dear AP Physics Students,

Welcome to the study of Physics!

Physics is the science on which all other sciences are based, and this class will benefit your study of any other science. Physics, itself, however, relies on a firm basis in mathematics. I have identified several math topics that you should make sure you are comfortable with before you begin Physics in the fall. Assignments to help you brush up on these math topics are assigned on Khan Academy. If any of the topics are confusing or difficult please make sure that you review the material in more detail. The Khan Academy videos are linked with the topics, and you can review any, even if they are not assigned through the class. If you find yourself having a lot of difficulty with a topic, please reach out to me so we can try to address the information before school starts.

For instructions on how to access the Khan Academy assignments, please check your email.

You will be assigned a grade for this work so get started as soon as possible!

If you have any questions, feel free to email me at mpanagotopulos@tkcs.org.

Thank you!

Mrs. Panagotopulos
